Knowledge Work

The tangible output of knowledge work are deliverables that are completed by tasks that ought to follow structured workflows:

1. Using a template
2. Identifying intake and output types on a datasheet
3. Following a Procedure
4. According to Guidance and Examples
5. Generating the specification or specific artifact

Knowledge work addresses these aspects:

1. Problem Statement
   a. Scope
   b. Assumptions
   c. Limitations
2. Problem Requirements
   a. Criteria
   b. References, Codes, standards, specifications
3. Solution process
   a. Methodology
   b. Analysis
   c. Outcomes
4. Verification
5. Evaluation
6. Validation
7. Assessment (Recommendation)
8. Implementation
9. Reflection
10. Resolution
